A Guide to Council Working Groups and the Forums

First you need to register if you have not already done so. Click on Register then enter a Username and Password. Please make the Username something which will enable other Councilors easily recognize you.

Next step is to Login. Just enter the Username and Password you registered with. Logging in means you can see all the posts, add your replies, etc.

Once you have logged in you have access to more features!

The Council Working Groups are at the bottom of the main forums page listed in alphabetical order. Each Working Group has a Convener / moderator. He/she can edit and delete any posts in their Working Group.

When you have identified the Working Group/s you wish to participate in please click on the Subscriptions button.

As a subscriber to that Working Group you will be emailed when a new topic or reply is posted to that group.

While you’re at the Forums have a look at some of the other material there, better still add something!

Note for Convenors: If you believe that your Working Group discussions should only be viewed by Council please email peterbb@netspace.net.au and let me know.

Another option for Working Groups is to use the Chat area. This allows a small group (3 to 6 recommended) to have an online text discussion. Once you get used to the way it works it is quite a good way of meeting and you can cut and paste a written record of the meeting as you go along.
